### INVESTMENT COMMENTARY

The global equity market declined in April as expectations around near-term interest rate cuts by central banks faded in response to stubbornly high inflation. Just a few months ago, the market expected six rate cuts by the US Federal Reserve in 2024; however, current predictions are now down to one rate cut at the end of the year. This big change in expectations demonstrates the difficulty, and possibly futility, in forecasting macro variables.

SKAGEN Global underperformed its benchmark index in April. In general, we think our portfolio companies have reported decent figures for the first quarter, but the market has taken a slightly more pessimistic view. This contrast has created an opportunity to add to select holdings where we think the short-term myopia clouds the long-term inherent value.

The fund's top three absolute performers were Alphabet (Google), TMX Group and Nike. Alphabet reported stellar figures with impressive numbers across all divisions. We are particularly pleased to see the cloud division firing on all cylinders as it showed both growth and profitability for the fifth quarter in a row. Moreover, Alphabet introduced a dividend and thus broadened its investor base meaningfully. We project some juicy dividend hikes in coming years. TMX Group, the operator of the Canadian stock exchanges, continues to perform well and we look forward to attending its Capital Markets Day in Toronto this summer. Nike held its ground but has not yet reported quarterly figures.

The three worst performers in absolute terms were Canadian Pacific, DSV and MSCI. The freight market is somewhat challenged in the sluggish economy, but we expect it to recover over time. Both Canadian Pacific and DSV remain high-conviction holdings. MSCI sold off after the report showed lower subscription renewal rates, but the company CEO and CFO used the sell-off to buy more shares, which is a good sign.

Commentary on portfolio trading activity, if any, will follow at quarter end. We believe SKAGEN Global remains a highly attractive investment opportunity for investors with a multi-year investment horizon and the portfolio looks even more undervalued after the recent pullback.

### FUND PERFORMANCE<sup>1</sup>

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the fund's risk profile and management fees. The return may become negative as a result of negative price developments. There is a risk associated with investing in the fund due to market movements, currency developments, interest rate levels, economic, sector and company-specific conditions.

### RISK PROFILE

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Other risks not included in the summary risk indicator but materially relevant: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment.
