INVESTMENT COMMENTARY

In October, the global equity market gave back some of its earlier gains as the US 10-year government bond yield reversed course and marched upwards, well past the 4 percent mark. This reversal put the widely trumpeted market predictions about a flurry of near-term rate cuts from the Federal Reserve into question. SKAGEN Global does not attempt to predict interest rates, but we note that there are several inflationary forces at play in the world that at times seem to receive less attention than might perhaps be warranted.

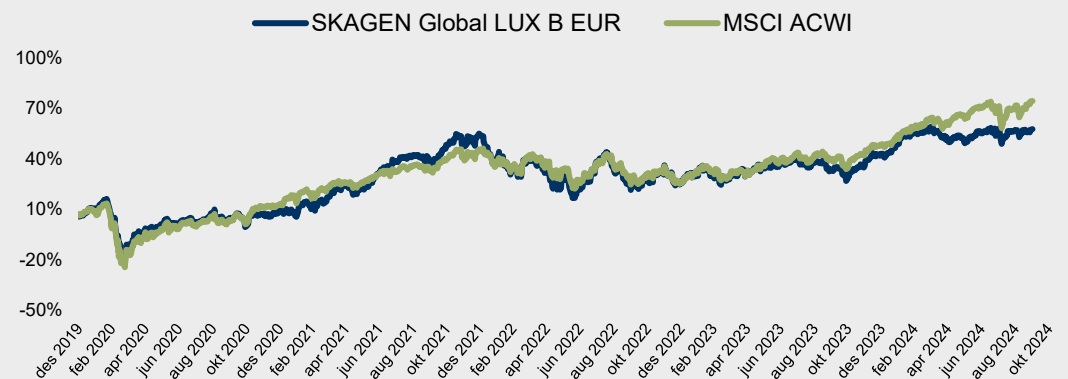

SKAGEN Global underperformed its benchmark index in October. The fund's three best absolute performers were DSV, JP Morgan and Alphabet (Google). The DSV share price is up approximately 50% since early summer as the Schenker transaction has finally materialised. JP Morgan continues to be the leading global bank with superb execution, in our view. The tech giant Alphabet (Google) delivered a strong quarterly report with upbeat figures from its cloud division.

The three worst performers in absolute terms were Canadian Pacific, ASML and Stora Enso. The freight railway company Canadian Pacific continues to integrate Kansas City Southern. The stock has been trading water for a while, but we are coming closer to the point when buybacks can be resumed. The Dutch semiconductor equipment manufacturer ASML fell as the quarterly order intake was lower than the market expected, but this number tends to be a volatile parameter given the size of the equipment. The Nordic forestry and packaging group Stora Enso scrapped its plan to sell the Beihai packaging board production site in China and instead revealed that it will divest 12% of its forest assets in Sweden.

We will provide further commentary on portfolio changes, if any, at the end of the quarter. The fund continues to closely monitor, analyse and act on relevant data points with a direct impact on the investment hypothesis on any holding in the portfolio. We find the portfolio clearly undervalued with an attractive risk-reward over a multi-year investment horizon.

FUND PERFORMANCE¹

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the fund's risk profile and management fees. The return may become negative as a result of negative price developments. There is a risk associated with investing in the fund due to market movements, currency developments, interest rate levels, economic, sector and company-specific conditions.

RISK PROFILE

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Other risks not included in the summary risk indicator but materially relevant: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment.
